

Dear Serdar,

Herewith our final product of Automation & Fabrication. First up are the bricks we use for the builds. The script for this was made by Ellen and Hessel. After these bricks are placed, the first structure is built. This script is made by Chiel. The construction is also taken down again, which is done by Wewen's script. After this, the second structure is placed and taken down. The building is done by Wewen's script, the dismantling by Hessel's script.
